AP-Touch Panels wide captivate with their noble piano-finish look. The completely flat surface is framed within a massive metal chassis. Having a depth of just 48 mm the panels are extremely flat. The strait white or black coloured frame doesn't emerge when mounted on a wall. Regardless of the flat construction the surface complies with protection class IP 65.

The used display is a wide screen LED LCD which works with a true flat projected capacitive touch offering the ability of gesture control. An Intel® Pineview Dual Core (D525 with 1.8 GHz) e.g Intel® Celeron (G540 2,5 GHz) for 21,5" is used as processor. Examples for work assignment are check-in desks, salesrooms, hospitals but also the e-home.
